Subject : letter of recommendation

Dear,

Ineltec is an engineering company dedicated to transfer improvement of polyurethane application. We works with different supplier concerning dismantling, assembling. I can confirm that ARGON have already done a good job during the dismantling of the unit in Noyon form Saint Gobain to saint Gobain Polska in Zary.

Then we asked you to dismantled a unit form TREVES Slovakia s.r.o. 059 52 Velká Lomnica

Slovakia, to TREVES Russia. The job has been done professionally, in the disconnection, dismantling of each part, packing; the reassembling has been done in Russia without any problem. During this job, we let work Argon in total autonomy.

We have already made some quotation of project and hope that I will have the opportunity to make a project with Argon again

Christian Christmann
Managing director
